

alیزé

Quench your skin

with alیزés cellular **Cream Dynamique** intensive repair

Restores and maintains for 24 hours the vital hydrolipidic actives which play an essential part in helping repair dry and dehydrated skins, thereby reducing the formation of fine lines and creating an epidermal environment that helps restore radiance, smoothness and firmness.

Cream Dynamique is another cellular restorative formula developed through research which stimulates the reparative functions in the epiderm.

Cream Dynamique has been blind tested against leading products that costs as much as \$999 and has out performed them in creating moisture, hydration and visible reduction of fine lines, leaving the skin smooth, soft, firm and radiant.

A deceptively light and silky textured treatment cream which re-energizes and refreshes your skin at a cellular level.

This treatment creams' texture and performance lend its application to multiple uses for the face as a treatment cream applied at night or as a day moisturizer that can be worn under your make up. Can be applied as a neck or bust cream.

**Experience the results
from this exciting new
alیزé treatment cream!**
